

[2016-New Latest 70-462 Dumps PDF Free Download In GreatExam (81-100)

Are you worrying about the 70-462 exam? GreatExam provides the latest 70-462 braindumps and guarantees you passing 70-462 exam beyond any doubt. QUESTION 81 Drag and Drop Question You administer a Microsoft SQL Server 2012 environment that contains a production SQL Server 2005 instance named SQL2005 and a development SQL Server 2012 instance named SQL2012. The development team develops a new application that uses the SQL Server 2012 functionality. You are planning to migrate a database from SQL2005 to SQL2012 so that the development team can test their new application. You need to migrate the database without affecting the production environment. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

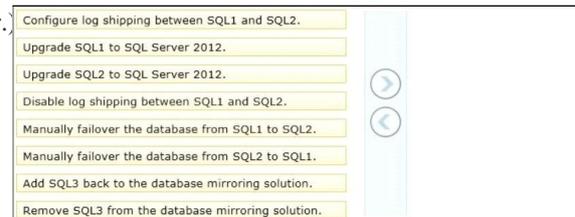

A list of actions for Question 81, each in a yellow box with a right-pointing arrow on the right side. The actions are: Perform a transaction log on SQL2005., Perform a full database on SQL2005., Perform a VSS backup on the database on SQL2005., Restore the VSS backup on SQL2012., Restore the database backup and transaction log backup on SQL2012., Change the compatibility level of the database to 120 on SQL2012., and Change the compatibility level of the database to 110 on SQL2012.

Answer

The answer area for Question 81 shows three actions moved from the list to the answer area, arranged in the correct order. The actions are: Perform a transaction log on SQL2005., Perform a VSS backup on the database on SQL2005., and Restore the VSS backup on SQL2012. The other actions remain in the list. The GreatExam logo is visible at the bottom.

QUESTION 82 Drag and Drop Question You administer three Microsoft SQL Server 2008 R2 instances. Database mirroring is configured in High-Safety mode with Automatic Failover between the following three servers:- SQL1 is the Principal server.- SQL2 is the mirror server.- SQL3 is the witness server. You need to upgrade SQL1 and SQL2 to SQL Server 2012. You need to ensure that downtime is minimized during the upgrade. Which six actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

A list of actions for Question 82, each in a yellow box with a right-pointing arrow on the right side. The actions are: Configure log shipping between SQL1 and SQL2., Upgrade SQL1 to SQL Server 2012., Upgrade SQL2 to SQL Server 2012., Disable log shipping between SQL1 and SQL2., Manually failover the database from SQL1 to SQL2., Manually failover the database from SQL2 to SQL1., Add SQL3 back to the database mirroring solution., and Remove SQL3 from the database mirroring solution.

Answer

The answer area for Question 82 shows six actions moved from the list to the answer area, arranged in the correct order. The actions are: Configure log shipping between SQL1 and SQL2., Upgrade SQL2 to SQL Server 2012., Manually failover the database from SQL1 to SQL2., Upgrade SQL1 to SQL Server 2012., Manually failover the database from SQL2 to SQL1., and Add SQL3 back to the database mirroring solution. The other actions remain in the list. The GreatExam logo is visible at the bottom.

QUESTION 83 You administer a Microsoft SQL Server 2012 server that has SQL Server Integration Services (SSIS) installed. You plan to deploy new SSIS packages to the server. The SSIS packages use the Project Deployment Model together with parameters and Integration Services environment variables. You need to configure the SQL Server environment to support these packages. What should you do? A. Create SSIS configuration files for the packages. B. Create an Integration Services catalog. C. Install Data Quality Services. D. Install Master Data services. Answer: B Explanation: <http://msdn.microsoft.com/en-us/library/hh479588.aspx> <http://msdn.microsoft.com/en-us/library/hh213290.aspx> <http://msdn.microsoft.com/en-us/library/hh213373.aspx> QUESTION 84 You

administer a Microsoft SQL Server 2012 server. When transaction logs grow, SQL Server must send an email message to the database administrators. You need to configure SQL Server to send the email messages. What should you configure?
 A. SQL Mail
 B. An Extended Events session
 C. Alerts and operators in SQL Server Agent
 D. Policies under Policy-Based Management
 Answer: C

QUESTION 85 You administer two instances of Microsoft SQL Server 2012. You deploy an application that uses a database on the named instance. The application is unable to connect to the database on the named instance. You need to ensure that the application can connect to the named instance. What should you do?
 A. Use the Data Quality Client to configure the application.
 B. Start the SQL Server Browser Service.
 C. Use the Master Data Services Configuration Manager to configure the application.
 D. Start the SQL Server Integration Services Service.
 Answer: B

QUESTION 86 Drag and Drop Question You administer a Microsoft SQL Server 2012 database. You use an OrderDetail table that has the following definition

```
CREATE TABLE [dbo].[OrderDetail] (
    [SalesOrderID] [int] NOT NULL,
    [SalesOrderDetailID] [int] NOT NULL,
    [CarrierTrackingNumber] [nvarchar(50)] NULL,
    [OrderQty] [smallint] NOT NULL,
    [ProductID] [int] NOT NULL,
    [SpecialOfferID] [int] NULL,
    [UnitPrice] [money] NOT NULL
)
```

You need to create a non-clustered index on the SalesOrderID column in the OrderDetail table to include only rows that contain a value in the SpecialOfferID column. Which four Transact-SQL statements should you use? (To answer, move the appropriate statements from the list of statements to the answer area and arrange them in the correct order.)

WHERE
FILTER ON
SpecialOfferID IS NOT NULL;
ON dbo.OrderDetail (SalesOrderID)
ON dbo.OrderDetail (SalesOrderID) AS FILTERED_INDEX
CREATE NONCLUSTERED INDEX FIdx_SpecialOfferID
CREATE NONCLUSTERED FILTERED INDEX FIdx_SpecialOfferID

Answer

CREATE NONCLUSTERED INDEX FIdx_SpecialOfferID
FILTER ON
ON dbo.OrderDetail (SalesOrderID) AS FILTERED_INDEX
CREATE NONCLUSTERED FILTERED INDEX FIdx_SpecialOfferID
WHERE
SpecialOfferID IS NOT NULL;
ON dbo.OrderDetail (SalesOrderID)

QUESTION 87 You administer a Microsoft SQL Server 2012 database. The database contains a table that has the following definition

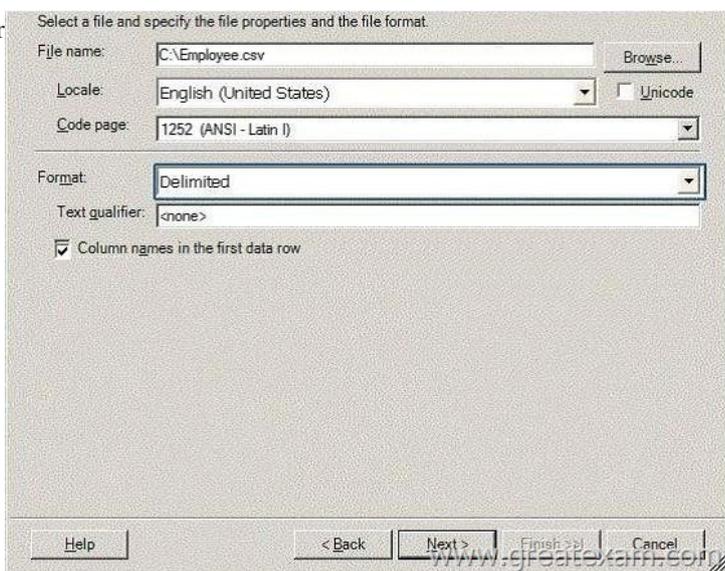

```
CREATE TABLE [Sales].[Customer] (
    [CustomerID] int NOT NULL,
    [CustomerName] nvarchar(50) NOT NULL,
    [TerritoryID] int NULL,
    [LastContactDate] datetimeoffset NULL,
    [CustomerType] nchar(1) NOT NULL,
    [Notes] varchar(250) NULL
)
```

www.greatexam.com

You want to export data from the table to a flat file by using the SQL Server Import and Export Wizard. You need to ensure that the following requirements are met:- The first row of the file contains the first row of data.- Each record is of the same length.- The date follows the U.S. date format.- The file supports international characters. What should you do? (To answer, configure the appropriate option or options in the dialog box in the answer area.)

Answer

QUESTION 88 You administer a Microsoft SQL Server 2012 database. Users report that an application that accesses the database displays an error, but the error does not provide meaningful information. No entries are found in the SQL Server log or Windows event logs related to the error. You need to identify the root cause of the issue by retrieving the error message. What should you do?

- A. Create an Extended Events session by using the sqlserver.error_reported event.
- B. Create a SQL Profiler session to capture all ErrorLog and EventLog events.
- C. Flag all stored procedures for recompilation by using sp_recompile.
- D. Execute sp_who.

Answer: A

QUESTION 89 You administer a Microsoft SQL Server 2012 instance that contains a financial database hosted on a storage area network (SAN). The financial database has the following characteristics:

- A data file of 2 terabytes is located on a dedicated LUN (drive D).
 - A transaction log of 10 GB is located on a dedicated LUN (drive E).
 - Drive D has 1 terabyte of free disk space.
 - Drive E has 5 GB of free disk space.
- The database is continually modified by users during business hours from Monday through Friday between 09:00 hours and 17:00 hours. Five percent of the existing data is modified each day. The Finance department loads large CSV files into a number of tables each business day at 11:15 hours and 15:15 hours by using the BCP or BULK INSERT commands. Each data load adds 3 GB of data to the database. These data load operations must occur in the minimum amount of time.

A full database backup is performed every Sunday at 10:00 hours. Backup operations will be performed every two hours (11:00, 13:00, 15:00, and 17:00) during business hours. You implement log shipping of the financial database to another SQL Server 2012 instance. You decide to failover to this secondary database. You need to ensure that all transactions will be replicated to the secondary database. Which backup option should you use?

- A. Differential
- B. Transaction Log
- C. FULL
- D. SIMPLE
- E. SKIP
- F. RESTART
- G. STANDBY
- H. CHECKSUM
- I. DBO_ONLY
- J. COPY_ONLY
- K. NORECOVERY
- L. NO_CHECKSUM
- M. CONTINUE_AFTER_ERROR
- N. BULK_LOGGED

Answer: K

<http://msdn.microsoft.com/en-us/library/ms178117.aspx> QUESTION 90 What is the maximum number of SQL Server 2012 Enterprise edition Database Engine instances that you can deploy on a non-clustered server running Windows Server 2008 R2 Enterprise edition? A. 10 B. 25 C. 50 D. 100 Answer: C QUESTION 91 You use Microsoft SQL Server 2012 to write code for a transaction that contains several statements. There is high contention between readers and writers on several tables used by your transaction. You need to minimize the use of the tempdb space. You also need to prevent reading queries from blocking writing queries. Which isolation level should you use? A. SERIALIZABLE B. SNAPSHOT C. READ COMMITTED SNAPSHOT D. REPEATABLE READ Answer: B Explanation: <https://msdn.microsoft.com/en-us/library/ms173763.aspx> Read committed snapshot listed as an isolation level next to the statement FILESTREAM-enabled databases support the following transaction isolation levels. QUESTION 92 You need to install the Power View Components on a stand alone server. Which three actions should you perform (and sorting)? A. Install SQL 2012 Analyse Services B. Install SQL 2012 Reporting Services C. Install SQL 2012 Database Engine and PowerPivot for Sharepoint D. Configure SQL Server Reporting Services and Addin in sharepoint mode E. Configure SQL Server reporting services in native mode Answer: BCD QUESTION 93 You plan to migrate the db to azure. You verify that all objects are valid for azure sql database. You need to ensure that users and logins are migrated to azure. What should you do? A. Use the Copy Database wizard B. Use the Database Transfer wizard C. Use the SQL Management Studio to deploy the db to azure D. Back up the databases from the local server and restore it to azure Answer: CD QUESTION 94 You maintain several dbs on a 64 bit ms sql 2005 instance. You need to migrate the dbs to sql 2012 on the same server. You also need to ensure functionality in sql 2012 can be used in the db after migration. What should You do? (each correct answer presents part of the solution) A. Perform an in-place upgrade to 64-bit in sql 2012 B. Perform a side by side installation of a 64 bit sql 2012 C. Perform a side by side installation of a 32 bit sql 2012 D. Detach the old instance and attach it to the new one E. Change the compatibility level of the db Answer: BDE QUESTION 95 You create a new user named UserA. You need to ensure that UserA is able to create SQL Server Agent jobs and to execute SQL Server Agent jobs. To which role should you add UserA? A. Securityadmin B. RSExecRole C. SQLAgentUserRole D. DatabaseMailUserRole Answer: C QUESTION 96 Hotspot Question You administer a Microsoft SQL Server 2012 database instance. Other applications run on the server. Some of the applications are throwing errors because of insufficient memory. You need to ensure that the other applications have sufficient memory. Which setting should you configure?

Answer:

QUESTION 97 You administer a database that has User A, B and C. User A must be able to create new tables and stored procedures, User B must be able to select, update, delete and insert data, User C must be able to provide windows logins to the database- db_accessadmin- db_ddladmin- db_datawriter- db_datareader- db_owner To which role or roles should you add the users? A. ddladmin B. datawriter, datareader C. accessadmin Answer: A

QUESTION 98 You are the administrator of a Microsoft SQL Server 2012 server. Some applications consume significant resources. You need to manage the server workload by restricting resource-intensive applications. You need to dynamically limit resource consumption. What should you do? A. Set up Service Broker to ensure that applications are not allowed to consume more than the specified amount of resources. B. Configure Resource Pools, Workload Groups, and Classifier Function, and then enable the Resource Governor. C. Configure Extended Events to monitor and restrict resource limits allowed by each application type. D. Create a new Plan Guide with a Scope Type of sql and define the resource limits for each application. Answer: A

QUESTION 99 You administer a Microsoft SQL Server 2012 database that includes a table named dbo.Log. This table contains millions of records about user activity in an application. Records in dbo.Log that are more than 90 days old are purged nightly. When records are purged, table locks are causing contention within inserts. You need to be able to modify dbo.Log without requiring any changes to the applications that utilize dbo.Log. Which type of solution should you use? A. Extended events B. Columnstore index C. Partitioned tables D. Read committed snapshot Answer: C

QUESTION 100 You administer a Microsoft SQL Server 2012 database named Orders. Users report that during peak usage periods, certain operations are taking more time than expected. Your initial analysis suggests that blocking is the cause. You need to gather more data to be able to determine which processes are being blocked and to identify the root cause. What should you do? A. Start a trace using SQL Server Profiler to catch the Lock: Deadlock event. B. Use sp_configure to set the blocked process threshold. Start a trace using SQL Server Profiler to catch the Blocked Process Report event. C. Schedule a SQL Agent job to run every 60 seconds and insert the results of executing the sys.dm_os_wait_stats DMV into a table. D. Use System Monitor to catch the Lock Waits/sec event. Answer: B

GreatExam offers the latest 70-462 PDF and VCE dumps with new version VCE player for free download, and the new 70-462 practice test ensures your exam 100% pass. <http://www.greatexam.com/70-462-exam-questions.html>
