### 2017 April Microsoft Official New Released 70-339 Dumps in Lead2pass.com! 100% Free Download! 100% Pass Guaranteed!

The Microsoft 70-339 PDF, 70-339 VCE and 70-339 exam questions and answers at Lead2pass are written and prepared by Microsoft affiliated trainers and lecturers with decades of experience in the IT field. This ensures that you are equipped with the latest and most current information to give you a better chance of passing the Microsoft 70-339 exam. Following questions and answers are all new published by Microsoft Official Exam Center: <http://www.lead2pass.com/70-339.html>

QUESTION 11 You need to monitor the resources for the Beijing office. Which three components should you implement? Each correct answer presents part of the solution.

- A. search
- B. proxy settings
- C. Distributed Cache
- D. SAML authentication
- E. claims authentication

Answer: BDE

QUESTION 12 Drag and Drop Questions You need to ensure that users can share sales data. For each authentication method, which option should you use? To answer, drag the appropriate option to the correct authentication method. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Note: Each correct selection is worth one point.

Answer: QUESTION 13 Hotspot Questions You need to create the managed paths for all site collections. For each site collection, which inclusion type should you use? To answer, select the appropriate inclusion type from each list in the answer area.

Answer: QUESTION 14 You need to select the backup solution for Contoso. Which solution should you use?

- A. premium tier Azure backup
- B. Basic tier Azure backup
- C. an on-premises backup solution
- D. Standard tier Azure backup

Answer: C

Case Study 2 - Blue Yonder Airlines (QUESTION 15 - QUESTION 24)

Background General Blue Yonder Airlines manufactures, sells, and services small commercial jet aircraft. The company has offices worldwide. Blue Yonder currently uses both SharePoint 2013 and SharePoint 2016. The company has a public website that is based on an ASP.NET web application. Service environment ( SharePoint 2013)- The legacy SharePoint 2013 farm runs SharePoint Server 2013. - This farm has over 200 site collections that are hosted on 20 content databases. There is no clear documentation that details which site collections are located in which content databases. - The SQL Server for the SharePoint 2013 is ServerRole2013.

Requirements File metadata Every file stored within the system must contain the following common document properties:- Document Status- Department- Author- Enterprise Keywords Values for the Document Status property must be displayed in English, Spanish, or French. The display language must be based on a user's language preferences. Additional fields or settings may be added in the future. You must be able to manage file metadata settings from a single location. When you make changes to settings, the changes must be applied to site collections and existing documents. This location must not be a part of the existing marketing, HR, or procurement team sites. Site collections Each departmental site must have a separate site collection. All departmental sites must be hosted in a single web application which is located at <http://sp.blueyonder.com>. Locations for the storage of personal documents for each employee should be created in a dedicated web application. Governance No custom development is permitted. Custom solutions must not be installed on the farm. Only configurations based on standard functionality are acceptable. Employees in the marketing, HR, and procurement departments are only permitted to have Read, Contribute, or Edit permissions to their sites. Human resources The human resources (HR) department is responsible for sharing information with all employees related to four themes: my work, my benefits, and my career. The naming of these themes may change overtime, and additional themes maybe added. It must be possible for someone from the HR team to edit the themes. The HR site on the intranet is divided into a top level site with three subsites. Each subsite represents a unique team. The global navigation of the HR site must feature a listing of the relevant themes and link to custom pages that list content for each theme. The site must not display links to subsites or other pages on the HR site. Team site URL The HR site must use the URL <http://hrblueyonder.com> Marketing The marketing department will use SharePoint to publish brochures, marketing materials, and announcements. Only final versions of these documents maybe added to the marketing team site for sharing with other Blue Yonder employees. Once a file is published, employees must be able to access the file by using a consistent link even if the file is renamed or moved within the site. User file storage Files that are in draft mode must not be accessible to any user except the author until the file is ready for review. Each marketing employee must have a single location for storing draft work, work in progress materials, and other personal files. Files stored in this location must only be accessible to the employee that owns the area unless the employee chooses to share a file with other users. The storage location must be created automatically for an employee and must not require assistance from IT for configuration. The URL for each employees' site must be <http://employees.blueyonder.com/mv/personal/username>. where username represents the login of the employee. Public website The public website is not part of the SharePoint environment. It is a standalone ASP.NET website. Content on the public website, including news and job postings, is updated once a month. Information posted to the public website must by accessible by using search. Information stored in the Downloads section of the website must not be crawled due to the large size and the number of files.

Team site URLThe team site for The department must use the URL, <http://marketina.bluevonder.com>. ProcurementThe procurement department uses SharePoint to store contracts and related documents. You must store these documents in a few document libraries as possible. The documents may contain precedents or terms that are relevant for reuse. The procurement site stores over 20 million documents. The term store for the site contains two million terms. File storageCurrently, the site consumes approximately 100 gigabytes (GB) of storage. This is expected to double within a year. It is expected that search will be a key feature for this group.

SearchWhen a search is conducted and a user hovers over the search result, the user must be able to easily launch the document, visit the library that is stored in, or preview the file. The links to the document and the library must appear above the preview of the file.

Team site URLThe site for the department must use the URL <http://procurement.bluevonder.com> ProductsThe product team uses the legacy SharePoint 2013 farm. You must upgrade the farm to SharePoint Server 2016 so that the product team can take advantage of all the services that are available to the other departments. The existing products site is very active. You must ensure that users cannot change the site content during the upgrade process. SharePoint 2016 Logical architecture- The SharePoint environment has two web applications. One web application is used for Departmental Collaboration, and the other is used for Central Administration.

- Each departmental site should be configured as a separate site collection. - All departmental sites should be hosted within the same web application. The web application is accessible at the URL <http://sp.bluevonder.com>- Locations for the storage of personal documents for each employee should be created in a dedicated web application. Server environment- The server farm is configured with SharePoint Server 2016 and Office Online Server. No additional addons or software packages are installed.- The SQL Server for the SharePoint 2016 farm is Server 2016. - The farm should leverage Min Role with a dedicated server for search.

QUESTION 15You need to configure search for the marketing public website. What should you create? A. a Content typeB. a SharePoint Site content sourceC. a Web Sites content sourceD. an Enterprise Search Center Answer: B

QUESTION 16Drag and Drop QuestionYou need to complete the configuration of the Search 2016 farm. How should you complete the Windows PowerShell command? To answer, drag the appropriate Windows PowerShell segment to the correct location or locations. Each Windows

PowerShell segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Answer: QUESTION 17In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem. Once you answer a question in this section, you will NOT be able to return to it. As a result these questions will not appear in the review screen. Note:

This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. You need to display the values for the Document Status and Department properties. You install a language pack. Does the solution meet the goal? A. YesB. No Answer: B

QUESTION 18In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem. Once you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. Note:

This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. You need to display the values for the Document Status and Department properties. You create a term set and Managed Metadata column. Does the solution meet the goal? A. YesB. No Answer: B
