

[Lead2pass New Easily Pass 200-310 Exam With Lead2pass New Cisco 200-310 Brain Dumps (281-300)]

2017 October Cisco Official New Released 200-310 Dumps in Lead2pass.com!] 100% Free Download! 100% Pass Guaranteed!

After purchasing the dumps for the 200-310 Exam from Lead2pass, I had no doubt that I'd easily pass the exam. Bundle of thanks to Lead2pass for helping me pass the exam without any troubles. Following questions and answers are all new published by Cisco Official Exam Center: <https://www.lead2pass.com/200-310.html>

QUESTION 281 In an enterprise Layer 2 switched network, which protocol must be running to enable link redundancy? A. CDPB. PAGPC. LACPD. STP Answer: D

QUESTION 282 What are two important aspects to consider when looking at backup circuit options for a branch location? A. Type of dynamic routing protocolB. Backup MPLS ConnectionC. Internet service provider diversityD. local exchange carrier diversityE. type of core switch Answer: AB

QUESTION 283 What is the maximum switch in VSS? A. 2B. 4C. 6D. 8 Answer: A

QUESTION 284 What is the technology that allows you to combine more than two switches? A. stackwiseB. vssC. vpcD. etherchannel Answer: A

QUESTION 285 Which phase of Cisco design life cycle the validation of network infrastructure happened? A. Assessment in planB. deployment in buildC. Validation in buildD. optimization in operate Answer: C

QUESTION 286 Drag and drop the top-down approach process Analysis of application and organization requirementsDesign from the top of the OSI reference modelDefine requirements for upper layers (Application, Presentation, Session) Specify infrastructure for lower OSI layers (transport, network, data link, physical)Gather additional data on the network Answer: Analysis of application and organization requirementsDesign from the top of the OSI reference modelDefine requirements for upper layers (Application, Presentation, Session) Specify infrastructure for lower OSI layers (transport, network, data link, physical)Gather additional data on the network

QUESTION 287 Which two network services should you host on the DMZ? (Choose two) A. WWWB. FTPC. DHCPD. DNSE. TACACS+ Answer: AB

QUESTION 288 What is the benefit of using VLSM? A. To save a wasted IP addressB. To expand a subnet Answer: A

QUESTION 289 In layer 2 design approach, how can you describe STP redundancy? A. It uses the most efficiency of redundant linkB. Only one link is active per timeC. It redistributes the traffic between links Answer: B

QUESTION 290 What is the VLAN subnet that can handle 60 hosts? A. /21B. /24C. /25D. /26 Answer: D

QUESTION 291 A network engineer must collect application-level information of deep attack? A. NBARB. CiscoWorksC. SNMP collectorD. NetFlow collectorE. Syslog Answer: D

QUESTION 292 When you make a change on a network, what is the consideration of environment Data center network? A. LocationB. Air condition and coolingC. storage and rackD. Floor & Answer: B

QUESTION 293 Which is in build stage? A. assessmentB. validationC. deployment Answer: BC

QUESTION 294 What is the important in access layer? A. Port securityB. Spanning tree Answer: AB

QUESTION 295 Which QoS level should VoIP set on WLC? A. PlatinumB. GoldC. premierD. critical Answer: A

QUESTION 296 Which Cisco technology can connect more than two switches so that they behave as one switch? A. EtherchannelB. TrunkingC. VSSD. Stackwise Answer: D

QUESTION 297 Which two processes are included in the Build phase of the Cisco Design Life Cycle? (Choose two.) A. DesignB. ValidationC. AnalysisD. DeploymentE. Assessment Answer: BD

QUESTION 298 What are two benefits of Top Down approach? (Choose two.) A. Incorporate organizational requirementsB. Design will follow applicationC. Based on previous experience and quick response. Answer: AB

QUESTION 299 When designing changes to an existing network, which two options are documented to understand environmental constraints? (Choose two.) A. Utilization of network resourcesB. Floor and rack space availabilityC. Host naming conventionsD. Heating and Air conditioningE. Location of existing documentation Answer: BD

QUESTION 300 In the traditional hierarchical LAN design, which two statements about the distribution layer are true? (Choose two.) A. It typically is connected directly to the Internet. It provides users direct access to the networkB. It uses Layer 2 switching onlyC. It aggregates data from the access layerD. Policy is implemented at this layer Answer: CD

I understood all of the 200-310 questions very easily. I scored 96% on my first try. I am definitely going to spread the dump among friends and colleagues. Keep up the great work.
